How to read our Application Guide and Product Rating

Applications

The following icons are used throughout this catalogue offering a general guide to the most suitable applications of each product. If you have any special or unique applications which are not covered in the following categories we can advise you on the most suitable product for your needs.

Offices and commercial buildings

Suitable for many applications in offices, foyers, entrances, receptions, sales and service desks. Generally a hard wearing mat for heavy traffic areas.

Shopping Centres & shops

Matting suitable for shopping centres, entrances, retail outlets and department stores. Generally a hard wearing mat for heavy traffic areas.

Educational institutions

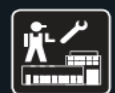

Ideal matting for universities, colleges, primary & secondary schools, libraries and maintenance departments.

Kitchens, restaurants & food preparation

A multitude of applications in food preparation areas, cafes, clubrooms, bars and venues. The products offer good standing comfort and hygienic properties.

Industrial & manufacturing

Best suited for assembly lines, engineering workshops, machine shops, maintenance departments, food processing plants and abattoirs.

Sporting facilities

Suitable for change rooms, gymnasiums, tennis courts, fitness and swimming centres.

Product Rating

The following graph is designed to make your product selection easier. It is a basic guide with different features rated from one to five stars depending on the individual characteristics of each product. If you require further information on any product please speak with one of our specialists.

NOTICE We are continually working to improve and add new products to our range. For this and other reasons we may make changes to the product details set out in this catalogue without any further notice. Any supply will be subject to availability at the time of the receipt of your order. On request we will provide amended product particulars or details of suggested alternative or replacement products.

Entrymaster® Classic 200

Entrymaster Classic has proven itself time and time again as an excellent performing polypropylene entrance mat. Like the Premier, Entrymaster Classic has a rubber-reinforced profile to prevent the pile crushing, even in the highest traffic areas. Entrymaster 200 also features the same 'Water Dam' edge which retains dirt and water.

- ✓ Raised pattern will not flatten.
- ✓ Ideal for high traffic areas.
- ✓ Excellent dirt and water retention.
- ✓ Cleated back minimises movement on most surfaces especially carpet.
- ✓ Moulded rubber edge is tear, curl and damage resistant.
- ✓ Easily cleaned by sweeping, vacuuming or hosing.
- ✓ Durable polypropylene will not fade, rot or stain - dries quickly.
- ✓ Anti-static, safe for use in sensitive areas rating 1.2KV.
- ✓ Passes flammability standards DOCF1-70.
- ✓ Can be supplied without edges for use in recesses.

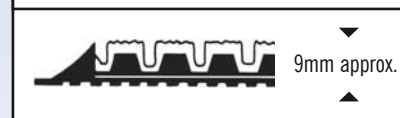

indent only

Applications

Very hard wearing product which performs well in all high traffic applications such as shopping centres and educational institutions.

Entrymaster® Premier 295

The ultimate **Heavy Duty Entrance Mat** giving long life and effective feet cleaning to stop all kinds of dirt and moisture at the door. Entrymaster Premier features a 36 ounce Heavy Duty multi-denier polypropylene yarn system. It is manufactured with a rubber-reinforced profile to help prevent crushing of its dirt entrapment system. Premier also features a 'Water Dam' edge which retains dirt and water within the mat.

- ✓ Ideal for high traffic areas.
- ✓ Raised pattern will not flatten.
- ✓ Excellent dirt and water retention.
- ✓ Cleated back minimises movement on most surfaces especially carpet.
- ✓ Moulded rubber edge is tear, curl and damage resistant.
- ✓ Easily cleaned by sweeping, vacuuming or hosing.
- ✓ Durable polypropylene will not fade, rot or stain and dries quickly.

	Sizes include edging

Entrymaster® Roll Goods 271

- ✓ Ideal for high traffic areas.
- ✓ Designed for placing in recesses and large inlay areas.
- ✓ Smooth rubber backing: Ideal for hard surfaces.
- ✓ Similar to Entrymaster Premier 295:
 - Heavy duty polypropylene yarn.
 - Raised pattern will not flatten.
 - Excellent dirt and water retention.
 - Easily cleaned by sweeping, vacuuming and hosing.
- ✓ Available with edging for loose lay applications.
- ✓ Colours: Black Smoke, Southern Pine, Indigo.

Applications

An exceptionally hard wearing product ideally designed for recesses, but also comes with edges. Excellent performance in high traffic areas such as shopping centres and educational institutions.

Also applies for Entrymaster Premier 295

Duratred 516

The ultimate aluminium matting, gives a classy architectural look to an entrance. Clean lines of extruded aluminium combined with moisture absorbing material effectively cleans and removes dirt and moisture from passing feet resulting in a clean and safe entrance area.

- ✓ Designed to be placed in mat wells.
- ✓ Vinyl joining strips with cushioning feet fitted to isolate metal to metal and metal to concrete contact, effectively eliminating noise from foot traffic.
- ✓ Available with rubber inserts for anti-slip.
- ✓ Quality components ensure longevity in appearance and performance in even the highest traffic areas.
- ✓ Mat well frames available.
- ✓ Aluminium ramping available for loose lay applications.

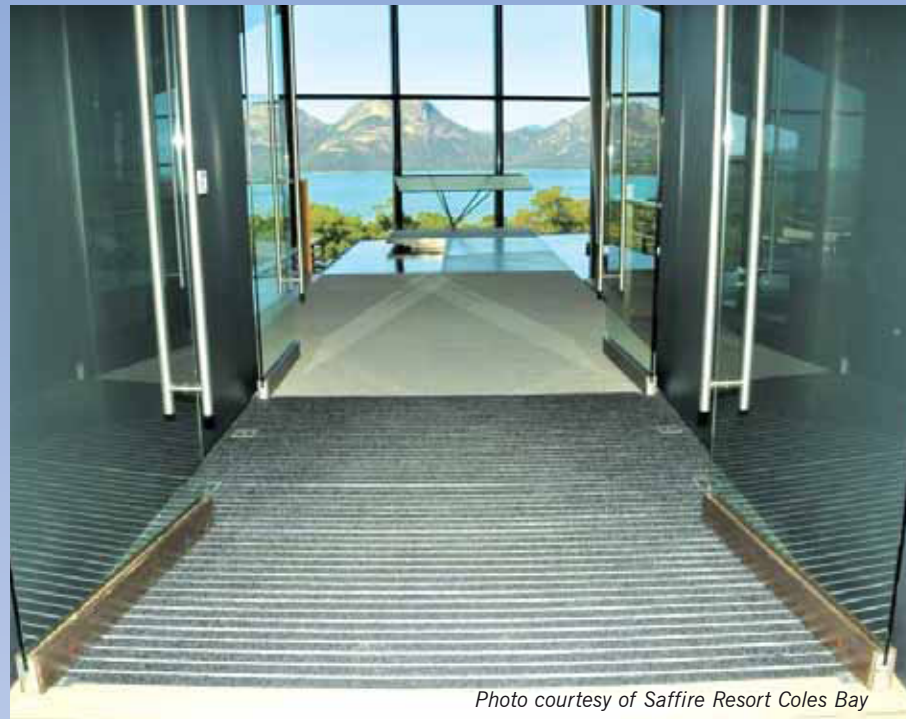

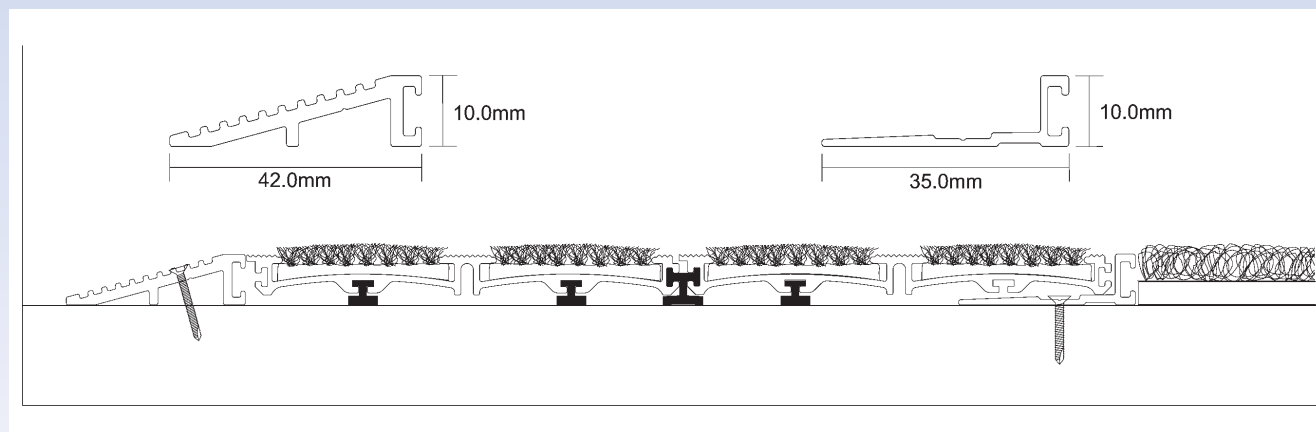

Photo courtesy of Saffire Resort Coles Bay

Duratred has a range of colours available to suit your needs and styles.

All Duratred mats are cut to suit our customers needs so any size or shape can be achieved, meaning that even the most discerning customer can be totally satisfied.

Duratred Mat Frame/Ramp System

No Screed, Mat Frame For Easy Installation

Duratred Ribbed Rubber

Duratred Ribbed is an alternative to the Duratred 516, for heavy traffic areas. Its construction and styling is similar to that of Duratred 516. The ribbed rubber set between the extruded aluminium ensures maximum durability and a classy aluminium look.

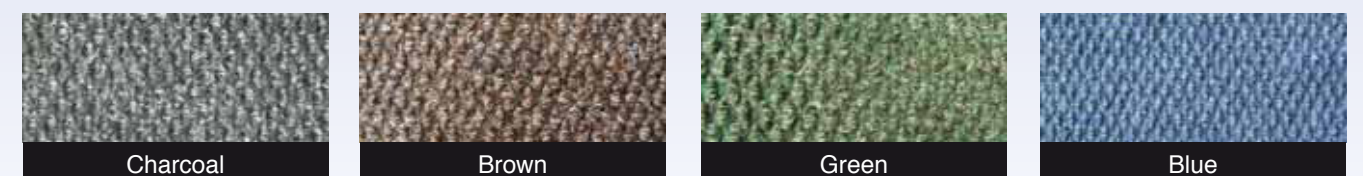

- ✓ Long life durability
- ✓ High dirt removing capacity
- ✓ Ideal for heavy traffic areas.
- ✓ Suitable for outdoor & indoor use.
- ✓ Classy architectural look
- ✓ Provides anti-slip surface

Photo courtesy of Saffire Resort Coles Bay

Duratred Supreme

Duratred Supreme is a premium quality aluminium/carpet strip mat with extra heavy duty scraper action inserts in a low 10mm design. The hobnail surface of the intense wear inserts provide optimum dirt and moisture removal in all conditions.

Duraclean 290

Duraclean is available in 2.0m and 4.0m wide for large entrance areas, air locks, shopping centres, etc. Economically priced, it provides a durable alternative for either loose lay or recesses.

- ✓ Ideal for high traffic areas.
- ✓ Ideal for large recesses.
- ✓ Excellent dirt and water retention.
- ✓ Easily cleaned by vacuuming or hosing.
- ✓ Durable polypropylene will not rot, fade or stain and dries quickly.
- ✓ Can be edged with heavy duty edging for loose lay.
- ✓ Vinyl backing on 2.0m wide, waffle backing on 4.0m wide.
- ✓ Passes flammability standards.

Applications

A hard wearing mat offering excellent performance in high traffic areas such as shopping centres and educational institutions.

Agri-Mat

DAIRY ENTRY & EXIT

Cows are more confident and sure footed, when walking and turning on AGRI-MAT™ .

This relieves stress on your cows, leading to improved production. It also helps to avoid injury and lameness caused by hard slippery concrete.

DAIRY PLATFORMS

In milking areas it is important for cows to walk and stand on soft floors.

AGRI-MAT™ proven grip surface ensures confident walking and increased comfort.

FEEDLOTS

AGRI-MAT™ has become increasingly popular on Australian and New Zealand farms.

AGRI-MAT™ makes the ideal surface in a feedlot as it replaces the feel of a natural pasture, making cows more comfortable and content.

STOCK SIZES (WxL)

2.4m wide 1.0m - 45.0m	

Non-Conductive Vs Conductive

NON-CONDUCTIVE:

Non-conductive matting is designed to insulate workers, protecting them from deadly shocks generated by high voltage equipment.

These mats are tested and proven to have high dielectric strength. However, the maximum recommended voltage exposure rating is much less to provide a large margin of safety to workers.

This is important as switchboard matting is a true safety mat, designed to save people's lives.

CONDUCTIVE:

Conductive matting is designed to protect sensitive equipment by draining static electricity from workers before they touch susceptible chemicals and equipment. This is critical as one discharge could destroy a computer or cause a fire in the case of flammable chemicals or liquids.

As personnel can quickly gather static electricity when walking or rolling on a chair with castors, we offer both Electrically Conductive and Static Dissipative matting to eliminate these harmful hazards.

Electrically Conductive mats disperse static electricity quicker than Static Dissipative mats, so generally Electrically Conductive matting is used around very sensitive components.

All Conductive and Dissipative mats should be grounded to be effective.

Switchboard Matting 750

- ✓ Durable 1/4" PVC corrugated runner improves safety with increased traction.
- ✓ Designed to protect workers from high voltage equipment.
- ✓ Dielectric strength, up to 30,000 volts (VAC).
- ✓ Recommended maximum usage - 17,000 volts (VAC).

Applications

High quality, electrically insulating matting, designed to protect workers from high voltages.
